

Cover Letter

Dear Sir/Madam:

I am currently a student in University of Toronto, studying Computer Engineering, and looking for a job as a software engineer/web developer.

I have plenty of experience on web developing, especially with the MEAN stack (Mongo, Express, Angular, NodeJS). As an asset, I also have experience on Android development.

I am a web fanatic and love to learn the most up-to-date technology of web. However, I am not a technology nerd, I love life and like parties and travelling and really hope to work in an energetic team.

I would appreciate if I am given the opportunity of interview to prove my qualification and capability in this job.

Regards,

Siyang Zhao
